SCREENSHOTS FROM SAP LEARNING HUB

In the SAP Learning Hub, a wide variety of learning resources are available. Users can explore content based on product, role, industry, or learning type. The platform also offers training courses and certification programs to help learners develop specific skills and gain professional recognition.

KEY OBSERVATIONS

SAP

- Integrates multiple **business processes** such as finance, logistic, human resources and production through a centralized ERP system
- Demonstrates how **data flows across modules** to improve process efficiency and decision-making
- **S/4HANA system** supports **real-time data processing** and enables better collaboration across departments

PPG

- Integrates **automation and data systems** to ensure consistent product quality and operational efficiency
- **Innovation & Sustainability initiatives** show how digital tools support R&D, smart manufacturing and eco-friendly processes
- Career section highlights the importance of **digital and enterprise system skills**

SAP PROCESS FLOW: PROCURE-TO-PAY (P2P)

HOW IT APPLY IN PPG ?

In PPG's business, the Procure-to-Pay process is used to manage the purchase of raw materials such as pigments and resins. When the factory requests materials, SAP automatically creates purchase orders, updates inventory when goods arrive, and records supplier payments. This ensures smooth coordination between production, procurement, and finance.

COMPARISON TABLE

ASPECT	SAP ENTERPRISE SYSTEM	PPG DIGITAL BUSINESS MODEL
PURPOSE	Integrated ERP platform for business processes	Global company using digital tech for operations
CORE FOCUS	Process integration, data management	Digital innovation in manufacturing
EXAMPLE TECHNOLOGY	SAP S/4HANA, BTP	Smart coatings, IoT, analytics
BENEFIT	Real-time data and efficiency	Sustainability, quality, customer solutions

THANK YOU
